Make your home a
sanctuary.

Mechanical room, living room,
kitchen, or closet – architecture is
grounded in its humanness.
We are endlessly grateful to our clients
for their ability to share vision,
commitment to reduce energy,
and open-hearted engagement
in the design process.

At C&H, we are committed to designing homes that are sustainable,
both for the people who live in them, and for the environment in which they are built.

For thirty years, we have been at the forefront of ecological architecture making
joyful and beloved spaces for our clients' future.
